

BIG SIZE PLASTIC ENCLOSURES FOR EM-PRODUCTS

GENERAL FEATURES

- Material Polycarbonate or ABS
- Protection class IP65
- Mounting plate available
- Indoor or outdoor use

These housings can be used with several EM-products. These housings offer protection class of IP65, and are based on FIBOX MNX series. Material is mostly PC (polycarbonate) but ABS is also an option. PC is suitable for indoor and outdoor use, as ABS is recommended only for indoor use. Some cards can be installed directly to housing but some products require a mounting plate for assembly. We have also available some pre-drilled mounting plates.

HOUSINGS

EM-T39 PC 180x130x60mm outlets PG11 + 9xPG9 in long side (mounting plate T37)

EM-T44 PC 180x130x60mm outlets 2xPG11 + 4xPG9 in short side

EM-T48 PC 180x130x100mm outlets 2xPG11 + 4xPG9 in short side

PG9 for cables with diameter 3 - 7mm

PG11 for cables with diameter 4 - 9mm

NOTICE! When card is installed in a plastic box, the continuous power rating will decrease. This because the cooling of the card is not as effective as in free air.
